LINEAR ARRAY LOUDSPEAKER SYSTEM

The Apogee **ALA-C1 Line Array Loudspeaker** is a high-fidelity, 70V/8-ohm, passive, 2-way fixed column, indoor/outdoor loudspeaker designed for speech enhancement and music reproduction in small-sized and medium-sized public spaces, such as school and civic auditoriums, theaters, lecture halls, and houses of worship.

The design offers extremely broad horizontal dispersion (140-degrees) and focused vertical dispersion (25-degrees) – which is ideal for uniform side-to-side coverage while minimizing ceiling and floor reflections that could degrade intelligibility.

DESCRIPTION

- 43" (110cm) line array
- Powder coated 6063-T5 extruded aluminum alloy enclosure with internal ribs
- 6 x 1" metal alloy diaphragm tweeters with Ferrofluid damping, UV and chemical resistant rubber surrounds, corrosion-resistant magnets
- 9 x 4" metal alloy diaphragm woofers, with Ferrofluid voice coil guidance, UV and chemical resistant rubber surrounds
- 70V transformer built-in, with bypass for 8-ohm operation
